

## METHODOLOGY FOR APPLICATION OF MYK TOP L 400

### Description:

**MYK Top L 400** is a low viscosity liquid based on lithium silicate chemical consolidating agent for concrete and screed. It penetrates deeply into the concrete.

**Packing:** 20 and 230 Kg Pack

### Methodology for Application:

**Step-1:-** Application of **MYK Top L 400**

### Application of MYK Top L 400:

**MYK Top L 400** is a very simple brush and spray application. It is applied evenly on the substrate until to fill the pores.

### Application Areas:

Production areas, storage areas, cool rooms, car parks, ware houses, food industry etc.

### Coverage:

100-200 ml per m<sup>2</sup>.

### Protection:

**MYK Top L 400** should be applied with gloves and care should be taken to see that it doesn't fall on screen or eyes. Splashes on the eyes have to be immediately washed with plenty of water and medical advice to be taken.

**Note:** - All coverages mentioned above are theoretical and under laboratory conditions, MYK Schomburg strongly recommends actual site trials to ascertain actual coverages.
