

METHODOLOGY FOR APPLICATION OF MYK RUST REMOVER

Description:

MYK Rust Remover is very effective product for removing mill scale and rust, besides removing thin films of oil and grease from steel surfaces.

Packing: 1 lit pack

Methodology for Application:

Step-1:- Application of **MYK Rust Remover**

Application of MYK Rust Remover:

It is a very simple application by brush.

In case of heavy rust steel reinforcement remove the loose the rust by wire brushing, hammering, and chipping. Then apply **MYK Rust Remover** on the effected areas by brush and leave the surface to react for 15-30 minutes. Then the rusty surface will change their colour. After that removes the loose particles of rust by wire brush.

Application Areas:

Corroded steel surface, tank, water pipe lines, shuttering etc.

Coverage:

It is applied in no. of coats which depend on the surface condition. No. coats to be applied until the desired results are obtained.

Protection:

MYK Rust Remover should be applied with gloves and care should be taken to see that it doesn't fall on screen or eyes. Splashes on the eyes have to be immediately washed with plenty of water and medical advice to be taken.
