

## **METHODOLOGY FOR APPLICATION OF MYK AQUAFIN ADMIX / ADMIX PRO**

### **Description:**

**MYK Aquafin Admix** is a high dispersion crystalline admixture waterproofing system for concrete structure which resists high hydrostatic pressure from both positive and negative side with crack bridging capacity upto 0.4 mm.

**Packing:** 25 Kg can , 200 Kg drum.

**Step-1:-** Application of **MYK Aquafin Admix**

Stir well before using **MYK Aquafin ADMIX**

### **Application of MYK Aquafin Admix:**

**MYK Aquafin ADMIX** can be dosed together with the gauging water or to the ready mix is the last component.

### **Application Areas:**

Tunnels, foundations, basements, Podium, reservoir, water treatment plant, swimming pool, underground ducts, Area where extremes waterproofing is not possible.

### **Consumption:**

W/C ratio < 0.45 - 2% of cement content by weight

W/C ratio > 0.45 - 3% of cement content by weight
